Seeking Partner Agencies (No)

<b>Automation Name</b>	Internal Revenue Service (IRS) Automated De-Obligation Utility
<b>Implementing Agency</b>	Department of the Treasury's Internal Revenue Service (IRS)
<b>Description of Automation</b>	<p>Automated de-obligation utility allows a user to input information on one screen to complete an automated de-obligation on contract actions. De-obligation reports are generated twice a year and have an approximated total of over 10,000 lines to be processed. The automated de-obligation utility drastically reduces the user's time to complete the system actions required for de-obligations.</p> <p>Furthermore, the automated de-obligation utility drafts a user's SF-30 with the descriptive language, completes the mathematical calculations and line-item de-obligations and has the ability to reduce the total of the award, depending on the Contracting Office/Contract Specialist (CO/CS) response in the utility.</p> <p>The automated de-obligation utility also files a draft copy of the modification to the system of record and updates the FPDS record.</p>
<b>Type of technology used</b>	Mapping

Deployed (Yes)

Automation Exportable to Other Agencies (No)

Seeking Partner Agencies (No)

<b>Benefits of Use</b>	Greatly reduces the amount of time, from hours to a matter of minutes, to complete de-obligations.
<b>Automation Status</b>	In Production
<b>Agency ATO Completed</b>	No
<b>Is the automation exportable for use by another agency?</b>	No
<b>Primary Data Sources</b>	IRS Procurement for Public Sector (PPS) System
<b>POC Contact</b>	Sandra Taylor, <a href="mailto:Sandra.E.Taylor@irs.gov">Sandra.E.Taylor@irs.gov</a>
<b>Lessons Learned</b>	The de-obligation tool reduces processing time by streamlining activities, reducing the number of steps, and performing calculations.
